- ●●●●● MS Office

EXPERIENCE

CAJA DE SALUD DE CAMINOS
May 2023 - Aug 2023

- Administration system with PHP and JS for management of orders, sales and a daily product inventory.

- Designing a user interface from scratch and implementing it in a web interface using CSS.

- This successfully developed software replaced the way that the kitchen manager used to take orders and make reports, avoiding inconsistencies in the information.

- It increased the speed of capturing customer order by 200% and improved efficiency in kitchen management and control of assets and liabilities in the sales.

IMAGE SEARCH ENGINE
Feb 2024 - Mar 2023

- Imagen serch engine aplication with Java Script, HTML, CSS and Pixabay api.

- The user interface was designed from scratch and implemented in a web interface using JS.

- This app is useful for serching any images that the user requires.
